

SOFTWARE RADIO TECHNOLOGY PLC

Appointment of Managing Director of SRT PMR Technology Limited

The Directors of Software Radio Technology plc (“SRT” or the “Company”) are pleased to announce that Dr. George Kyrios has been appointed Managing Director of the Company’s wholly owned subsidiary SRT PMR Technology Limited.

Earlier this year the Company created two wholly owned subsidiaries focused upon their respective technologies and markets. SRT PMR Technology Limited is focused on providing core digital radio technology and product solutions to companies worldwide.

Dr. George Kyrios has a wealth of international business experience with a background in ‘blue chip’ multinational high-tech businesses, joint ventures and subsidiary companies supplying advanced products in global markets. He has held senior commercial and operational roles with major UK and EU engineering groups in the capital equipment, electronics, defence, telecoms, process, fire/security and marine industries.

He has an in-depth knowledge of engineering and manufacturing, has opened new B2B markets and created international sector leaders. Highly qualified with a PhD in Electronic Engineering, he is tri-lingual and has spent extensive periods living and working in Europe.

Simon Tucker, Group Managing Director of SRT, said: “I am delighted that a person of George’s experience and ability has joined the management team at SRT. SRT PMR Technology has a large number of opportunities and challenges and this appointment will help to ensure returns are maximised.”

George Kyrios, Managing Director of SRT PMR Technology said: “I have joined SRT PMR Technology at an exciting time with licence customers entering production and the recent launch of our own handset. I am looking forward to working with the rest of the talented team at SRT to drive the business forward in the future.”

About SRT:

Founded in 1987 and quoted on AIM in 2005, SRT focuses on the development of turnkey technology product solutions for homeland security applications. SRT's technologies are used by manufacturers to fast track and de-risk the development of their own products. SRT has focused on the areas of professional voice and data radio communications such as TETRA and maritime identification and tracking systems, such as AIS: both of which are global standards. The Company has a worldwide customer base with a business model based on customers paying royalties on each product manufactured.
