**US\$270,000 AIS Class B Module Order Received**

Software Radio Technology plc ("SRT" or the "Company") is pleased to announce that it has received new orders worth US\$270,000 for AIS modules destined for the market created by the recently announced Turkish AIS mandate.

The mandate requires approximately 15,000 commercial vessels to fit a customised AIS transceiver prior to December 2011. The objective of the mandate is to improve maritime safety and security.

SRT has formed agreements with strategic local partners who use SRT's range of AIS modules to locally manufacture AIS transceivers which meet the local specification.

Simon Tucker, SRT CEO said, "Following the commencement of the mandate in January, we have seen regular orders for our AIS modules and we expect this to continue over the next 18 months."
