

SOFTWARE RADIO TECHNOLOGY PLC

Unimo delivers first TETRA handsets to customers

The Directors of Software Radio Technology plc (“SRT” or the “Company”) are pleased to announce that Unimo Technology Co. Ltd (“Unimo”) has made its first commercial delivery of TETRA handsets to customers in South Korea.

The Unimo TETRA handset has been developed and manufactured in Korea and is based upon SRT’s core TETRA technology solution. During the last 12 months the handset has undergone extensive live network trials and received various formal approvals such as EU Type Approval, and network interoperability certification from Teltronic and EADS.

To date Unimo is the only Korean company to have developed and manufactured its own TETRA handset. Their understanding of, and proximity to, the local market has enabled them to develop a suitably customised handset and to provide a high level of service to users through a nationwide network of offices.

Having commenced initial deliveries, SRT understands that Unimo is actively engaged in tendering and negotiating a number of contracts both within Korea and other international markets, which have the potential to generate substantial future orders.

Simon Tucker, Group Managing Director of SRT said: “TETRA is a complex technology which few have mastered, therefore the delivery of the first handsets into customer hands is an important milestone for Unimo. As their long term technology solution provider, we are delighted that their product has been received so well by the market and will continue to work with them to improve and expand their TETRA product range in the future.”

About SRT:

Founded in 1987 and quoted on AIM in 2005, SRT focuses on the development of turnkey technology product solutions for homeland security applications. SRT’s technologies are used by manufacturers to fast track and de-risk the development of their own products. SRT has focused on the areas of professional voice and

data radio communications such as TETRA and maritime identification and tracking systems, such as AIS: both of which are global standards. The Company has a worldwide customer base with a business model based on customers paying royalties on each product manufactured.

About Unimo:

Unimo is a Korean based company which is listed on the Korean stock exchange. For 20 years the company has manufactured a comprehensive range of PMR radio products and other security type products such as CCTV. Unimo has a strong distribution and sales support network within Korea and a growing network of international partners. www.unimo.co.kr
